
A
Same current observation and future actions, different futures
Pusher displacement example
Condition A:
Smaller action response
Pusher
Movement
Condition B:
Larger action response
History t − 2
History t − 1
Current observation
Ground-truth future
Move
Pusher moves less
Pusher moves more
Identical current observation
Different future outcomes
B
Paired evaluation protocol
History A
observations + actions
History B
observations + actions
Frozen latent world model
weights fixed
Prediction A
Prediction B
Reference
1 Future discrimination
Hold the prediction fixed; compare the two true futures.
2 History benefit
Hold the true future fixed; compare predictions from A and B.
3 Response fidelity
The predicted response should match the true response.
true
predicted
Key
Prediction
True future
Matched condition
Other condition
Fixed for comparison
Shorter distance → lower error
